Utility Shortcuts

Windows + F1 . Run a program. Opens a new window in the current tag thing.
Windows + H / L . Increase current “client” or decrease current client width
Windows Shift K / J Rotate clients around in a tag. 1 becomes 2, 2 becomes 3, etc
Windows + Ctrl + Space “maximize” current client.

Switching Clients

Client = Application window.

Windows + 1 Go to Tag 1
Windows + Enter ... Start terminal in current tag (I'll find the correct term later and fix this)
Windows + Space Switch to next layout (like clicking the icon in the upper-right corner)
Windows + F Maximize current window
Windows + Shift + C .. Close current window
